

R. LAURENT

ULTRA-CLEAN TREATMENT MODULE

All types of caps
with or without measuring spoon

Infant milk powder

R. LAURENT

ULTRA-CLEAN TREATMENT MODULE

CLARANOR DECONTAMINATION

CAP DECONTAMINATION
with or without spoon

A compact solution

Decontamination aligned with the new requirements of the infant milk powder market.
3 log on E.Coli, S.aureus and other vegetative cells

Up to 300 caps/min

Low energy consumption

COMPACT

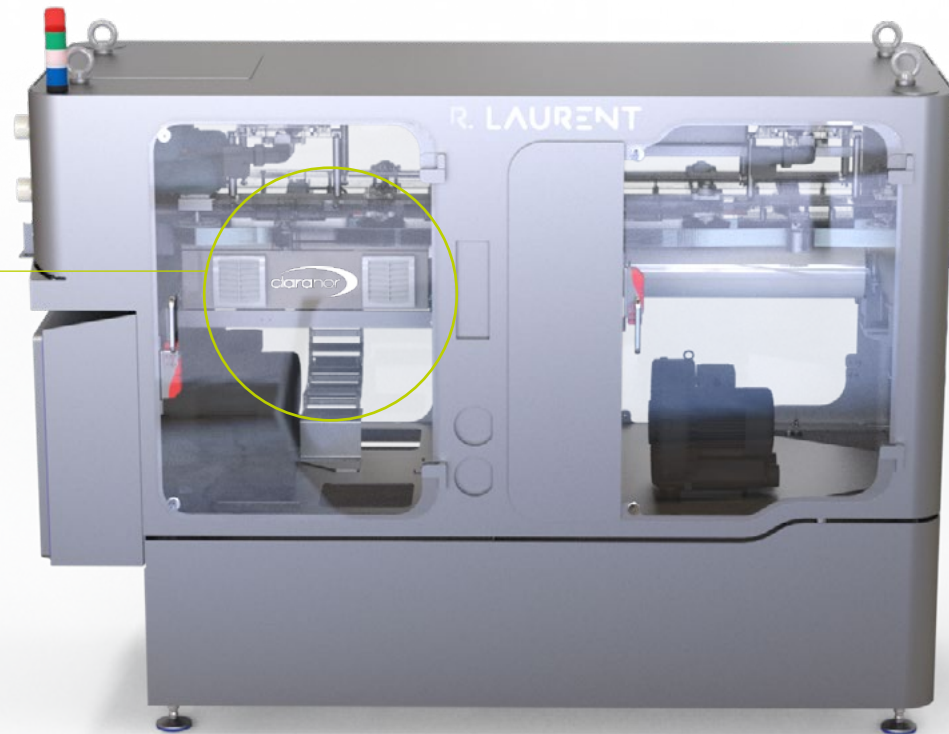

CLEANTECH

COST EFFICIENT

POWERFUL

CHARACTERISTICS

A simple and efficient processing module including:

- Belt conveyor
- Dust removal
- Chemical-free decontamination

Multiformat, all types of caps with or without measuring spoon, hinged type

Increased productivity

CLARANOR DECONTAMINATION

BELT CONVEYOR

DUST REMOVAL

ULTRA-CLEAN TREATMENT MODULE

CLARANOR DECONTAMINATION

R. Laurent is a key player in high speed capping machines, and has been a partner of SMEs and large industrial groups over 40 years.

By natively integrating Claranor decontamination solutions, R. Laurent offers to manufacturers:

**A GLOBAL CAPPING SOLUTION
FOR INFANT FORMULA,**

including decontamination of the packaging.

A SIMPLE AND EFFECTIVE ANSWER

to the new specifications, which are increasingly demanding in terms of safety and health quality especially for export.
