Versatech and Claranor Stretch your production !

The versatility of the dosing system offers the capability to fill almost any kind of product. While the user-friendly modularity of the Versatech® fastens the format change.

COMPACT AND MULTIFUNCTIONAL

The performing Synerlink Versatech® integrating Claranor Pulsed light decontamination offers dairy and food producers a **compact** and **multi-functional** packaging line.

RESPECTING QUALITY

The instant and **efficient chemical-free** treatment offered by **pulsed light**, class IV VDMA, allows you to fill with the requested **hygiene level**, a wide range of products while respecting the integrity of your packaging and your product quality.

endless flexibility!
